

Water Based Polyurethane

Deft Water Based Polyurethane is formulated with the latest water based oil modified urethane technology.

It provides superior weather resistance in all climates and premium UV protection from the sun's rays. This innovative product offers exceptional sanding characteristics, self-priming, and non-toxic when dry. It meets environmental regulations for VOC. Water Based Polyurethane provides crystal clear protection for interior and exterior wood surfaces including furniture, doors, floors, cabinets, window frames, above water-line marine applications, and much more.

Proven Durability.

- Deft's "OSC" technology ensures excellent hardness.
- Superior weather resistance, contains UV absorbers.
- For all hard use areas, resists abrasion, marring, alcohol and other common household chemicals.
- Use on stained or bare wood surfaces.

Quick & Easy.

- Low odor, non-yellowing, water clean-up.
- Dries to the touch in 30 minutes. Recoat in 2 hours.
- Complete entire project in one day.
- Apply with a brush, pad, roller, or spray application.

Protects Hard Use Interior/Exterior Areas.

- Entry Doors
- Crown molding, baseboards, and trim.
- Wood Floors.
- Windows.
- Great for use on "above waterline" marine wood surfaces.
- Furniture, cabinets, crafts and toys.

Finishes and Sizes.

- Available in three finishes: Gloss, Semi-Gloss, and Satin.
- Sizes include: Quart, Gallon, and 5-Gallon Pail.

APPLICATION:

1. Sand the wood to proper smoothness (do not use steel wool) and remove dust. Apply stain if needed.
2. If using stain, follow the instructions on the can to insure proper application and dry times.
3. Apply Water Based Polyurethane with a brush, pad, roller, or spray.
4. Let dry 2 hours between coats. Apply at least 3 coats. Where exposure or wear is severe, apply additional coats.
5. Sand between coats using fine (220 grit) sandpaper and remove sanding dust.
6. Clean brushes and/or other application tools with soap and water.
7. Sand and repeat when first signs of deterioration appear.
